R E S P O N S E T I M E

The regulatory desk behind crypto operators.

Rakemont builds the legal and corporate infrastructure that crypto casinos and exchanges run on: the license, the holding and operating companies behind it, and the policies regulators and payment partners expect to see. Everything runs as one engagement, with a fixed written quote issued before work begins.

02.1 Gaming licensing

License applications across 8 jurisdictions including Anjouan, Tuvalu, Vanuatu, Tobique, Curacao and Nevis. Incorporation, documentation, submission, and regulator correspondence under one fixed quote.

02.2 Offshore company formation

Holding and operating structures across Curacao, Anjouan, Costa Rica, Seychelles, BVI, Panama and Vanuatu. Substance arrangements, corporate maintenance, and banking introductions once the structure exists.

02.3 Legal counseling

Regulatory guidance, license conditions, platform and supplier contracts, player terms, and the AML and responsible gaming policy pack your license conditions require. Fixed quotes or monthly retainer.

02.4 Virtual asset licensing

Separate authorization for exchange, custodial wallet and token issuance activity. A gaming license does not cover it, and operators running both products need both.

Eight jurisdictions.

One fixed quote.

Ordered by year-one starting cost. Each figure covers regulator fees plus application management. Formation and the compliance policy pack are quoted separately.

Vanuatu

from EUR 21.5K

A long-validity license from a recognized Pacific jurisdiction. 15-year term, 1% GGR, and Provably Fair game certification accepted.

15-YEAR VALIDITY / 1% GGR

Tuvalu

from EUR 22.3K

The newest offshore regime and the only one requiring no local company. One license covers every vertical including crypto, with 0% GGR tax.

3 TO 4 WEEKS / 0% GGR TAX

Anjouan

from EUR 23.5K

The fastest and most cost-efficient route to a working gaming license. One license covers casino, sportsbook, and lottery. ADR becomes mandatory in 2026.

2 TO 6 WEEKS / 0% GGR TAX

KUNAISA

from EUR 32K

A new indigenous-authority regime in Panama covering gaming, forex and virtual assets. Internationally valid only, with mandatory geo-blocking.

4 TO 14 WEEKS / GEO-BLOCKING REQUIRED

Saint Kitts and Nevis

from EUR 34.5K

A Caribbean regime rebuilt in 2025 under a dedicated online gaming authority. One B2C license covers all verticals, with a separate B2B track for suppliers.

2 TO 3 MONTHS / 0% ON FOREIGN REVENUE

Tobique

from EUR 49.5K

A North American licensing route under the Tobique Gaming Act 2023, regulated by the TGC. No separate B2B supplier license required.

GAMING ACT 2023 / NO B2B LICENSE REQUIRED

Curacao

from EUR 58.5K

The best-known name in iGaming licensing, now under the reformed LOK regime with direct licensing from the Curacao Gaming Authority.

LOK REGIME / SUBSTANCE FROM 2026

Antigua and Barbuda

from EUR 95K

The oldest online gaming jurisdiction in the world, licensing since 1994. Premium fees, separate gaming and wagering classes, and genuine regulatory heritage.

3 TO 6 MONTHS / 3% ON NET WIN

Cost is one axis.

What each regime is actually good at, and the condition to check before you commit to it.

Vanuatu

Original and provably fair games, and anyone who does not want to renew for a decade.

Watch: Game fairness certification is required before issuance.

Tuvalu

Licensing a company you already own, and covering every vertical at once.

Watch: No access to regulated markets such as the UK, US, Australia, Germany, the Netherlands or Sweden.

Anjouan

Getting live fast on the smallest budget.

Watch: An ADR provider arrangement is mandatory from 2026.

KUNAISA

Operators who want gaming, forex and virtual asset licensing from a single authority.

Watch: Panama, the United States and OFAC-sanctioned jurisdictions must be geo-blocked. The regime is new and largely untested with payment providers.

Saint Kitts and Nevis

Operators who want a Caribbean regulator with a written framework rather than a legacy master license.

Watch: Payment provider acceptance is narrower than Curacao. Verify with your PSP before committing.

Tobique

Operators who want a North American regulator and simpler supplier contracts.

Watch: Domain licensing runs through DLAG at EUR 7K per five domains.

Curacao

Name recognition with payment providers, game suppliers and players.

Watch: Local substance from January 2026, a key person by April 2027, and ANG 100,000 share capital you hold yourself.

Antigua and Barbuda

Established operators who need regulatory heritage and can carry premium annual fees.

Watch: Casino and sportsbook are separate license classes with separate fees. A guarantee deposit is also required.

03.2

V I R T U A L A S S E T S

Anjouan Crypto License

from EUR 12.5K

A virtual asset license covering exchange, wallet, and token activity. The cheapest credible route to regulatory coverage for an offshore crypto operation.

3 TO 6 WEEKS / NO LOCAL INCOME TAX

03.3

W H A T T H E F I G U R E S M E A N

**Every quote is fixed,
and issued first.**

What the “from” figure covers

Regulator fees for year one plus Rakemont’s application management. It is the true floor for that jurisdiction, not a headline number that grows once the file is open.

What is quoted separately

Company formation, the AML and responsible gaming policy pack, and any share capital the regulator requires you to hold yourself. Curacao’s ANG 100,000 is the clearest example: it is your capital, not our fee.

Third-party fees are itemized

Regulator, agent, certification and domain fees appear as separate lines in the quote. You can see what goes to the authority and what goes to us.

Where figures are still moving

KUNAIISA and Antigua and Barbuda do not publish settled fee schedules. We confirm current terms with the authority directly before quoting rather than repeating agent pricing back to you.

E V E R Y E N G A G E M E N T I N C L U D E S

Fixed written quote, third-party fees itemized

A principal as your point of contact

AML, responsible gaming and player terms drafted to conditions

Banking and PSP introductions after issuance

Structure follows the license.

A holding company in BVI or Seychelles owns the licensed operating entity in the license jurisdiction, with support entities in Costa Rica where the operation needs them. Rakemont forms the full stack: incorporation, substance and director arrangements, corporate maintenance, and banking introductions once the structure exists to onboard.

Regulatory guidance

License conditions, market access, advertising restrictions, and what a regulator will actually ask for.

Compliance policy pack

AML and CFT programs, KYC procedures, responsible gaming and source of funds policies, drafted to your license conditions.

Contracts & documents

Platform, supplier and affiliate agreements, player terms, privacy policies, and the clauses that decide your exit.

Exchange & disputes

Exchange structuring, virtual asset authorization, blocked transaction correspondence, and counterparty disputes.

From first question to issued license.

06.1 Scoping

Operation, markets and budget matched to the right license and structure. A fixed written quote follows before any work begins.

06.2 Formation

Companies incorporated, substance arranged, corporate documentation prepared in the target jurisdiction.

06.3 Application

License file compiled, pre-screened and submitted, with regulator correspondence handled through to issuance.

06.4 Operation

License issued with a compliance calendar, policies in place, and ongoing counsel as the business runs.

License, structure, or counsel?

Describe the operation and what it needs. The quote that comes back is fixed, in writing, with third-party fees itemized. An NDA precedes anything of substance.
